1. Claims 5-11 and 13-23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims not been further treated on the merits.

2. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the second pair of forks recited in claim 3 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing

date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

The declaration identifies the attorney docket number, not the serial number of the application.

5. The disclosure is objected to because of the following informalities: The specification should not refer to claim numbers.

Appropriate correction is required.

6. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 lacks antecedent basis for the lock arrangement.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1, 2 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by European patent 85 306.

European patent 85 306 discloses a hinged grating having a pair of resilient forks with protruding journal members (42, 43) for engagement in a journal recess in a frame, with a lock arrangement that obscures a part when closed (56), as claimed.

9. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by European patent 506 591.

European patent 506 591 discloses a hinged grating having a pair of resilient forks with protruding journal members (18) for engagement in a journal recess in a frame, as claimed.

10. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over European patents 506 091 or 85 306.

Claims 3 and 4 differ from the European patents in recitation of a second pair of forks. It is submitted that the number of forks fails to patentably distinguish over the prior art, as a greater number of forks would obviously be desirable with a large and heavy cover, to provide additional support.

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other references of interest include the gratings with resilient elements disclosed by Donalson, Maguire, Ferns, and Speiss; the pivotal gratings of Egan, Dumortier, Smith, and Tu; and the lock of Burrows.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Upton whose telephone number is 571-272-1169. The examiner can normally be reached on 7:30-5:00, off every other Monday.
